Professional Summary

Top-performing Software Engineering graduate with strong architectural foundations and robust delivery experience from an internship at ThoughtWorks. Active open-source contributor passionate about Test-Driven Development (TDD) and clean software patterns.

Education

University of Warwick

Graduated 2026

BSc (Hons) Software Engineering — First Class Honours

Technical Skills

Java, JavaScript, TypeScript, Python, Spring Boot, React, Next.js, PostgreSQL, Hibernate, Docker, Git, Heroku, Jenkins CI

Work Experience

Software Engineering Intern

January 2025 - June 2025

ThoughtWorks

- Applied extreme programming and test-driven development methodologies to build corporate full-stack portals.
- Refactored legacy monolith endpoints into modern Spring Boot microservices, adding robust API security.
- Collaborated on configuring continuous integration build systems using Jenkins pipelines.

Personal Projects

Full-Stack Tech Career Marketplace

Technologies: React, Spring Boot, PostgreSQL, Docker, Heroku

Built a robust employment database platform with advanced keyword filtering, candidate portfolio uploads, and secure OAuth2 profile logins.

Open Source Contributions

Technologies: Git, GitHub, Java/JavaScript Frameworks

Successfully submitted multiple validated pull requests across several prominent ecosystem utilities, focusing on unit test suites and bug fixes.

Interests & Hobbies

Playing tennis, mechanical keyboards, and reading system architecture blogs.
