PROFESSIONAL SUMMARY

Motivated and detail-oriented computing graduate with foundational knowledge in software development, database design, and systems architecture. Experienced in executing academic technical tasks and collaborative team assignments. Seeking an entry-level position within an established IT department to apply my technical skills and contribute toward baseline organizational targets.

EDUCATION

Bachelor of Computing

Belgium Campus ITVersity, Pretoria | Graduation Year: 2025

- Successfully completed core modules covering multi-tier programming paradigms, software design principles, and enterprise network setups.
- Maintained solid conceptual marks in essential core logic, achieving a 91% in initial Linear Programming logic and 84% in foundational Web Development frameworks.
- Acquired hands-on exposure to practical industry simulations and systemic methodologies over a multi-year academic timeline.

CORE TECHNICAL SKILLS

Languages & Frameworks: Structural Programming Concepts, Object-Oriented Principles, Web Programming (HTML/CSS/Basic Scripting)

Database Systems: Relational Database Design, SQL, Basic Schema Normalization

Core Compiling Skills: Computer Architecture Concepts, Network Troubleshooting, Linear Data Optimization Models

Professional Competencies: Academic Report Writing, Basic Project Management Frameworks, Group Collaboration
